Illustrative only. Weather, recent driving, speed, heating or air-conditioning, terrain and load can change the dashboard estimate.

## Estimated manufacturer battery warranty remaining

TIME REMAINING

6 years, 3 months

MILEAGE REMAINING

81,287 miles

COVER NORMALLY ENDS

Whichever comes first

# EV BATTERY HEALTH CERTIFICATE

In-person inspection evidence for buyers, sellers and owners

PUBLIC DEMONSTRATION - IDENTIFIERS REDACTED

PHYSICAL PROOF

## Real inspection evidence, safely anonymised

A customer certificate stores the original vehicle and VIN photographs. This public demonstration withholds the identifiers for privacy.

### Physical vehicle photograph

Captured at the appointment and attached to the issued certificate.

IDENTIFIER REDACTED

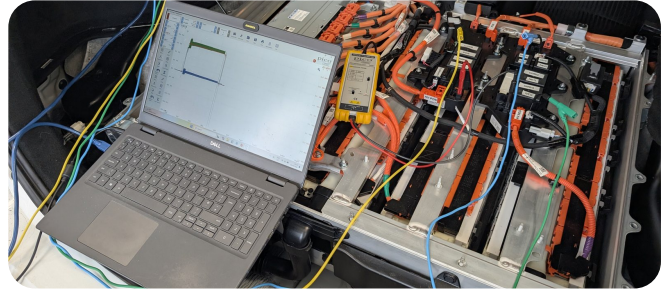

### VIN photograph and match

The VIN image is checked against the vehicle record before issue.

VIN WITHHELD

Electrical safety and insulation checks

Battery access and measured test process

### What this certificate gives the customer

- A vehicle-specific result, issued after an in-person inspection
- State of Health, State of Charge and battery specification
- A current-charge range reading with a clear 100% illustration
- Estimated warranty months and miles remaining

### Technician conclusion

Battery condition is excellent for the vehicle's age and mileage. No imbalance concerns were identified in the recorded assessment.

SIGNED WORKSHOP RECORD

## Professional standards and accreditation

### Public sample privacy note

This demonstration intentionally removes the customer's name, contact details, registration and VIN. A certificate delivered to the customer contains the matched evidence captured during the actual inspection.
